

Now available with reflective backing!
Try our new Reflective DryTips®

Video and instructions for use available at www.microbrush.com/drytips

Ultimate Saliva Control

Far outlasts cotton rolls and other absorbent pads, and doesn't lose moisture when handled.

The DryTips® advantage over traditional cotton rolls:

- Complete coverage of parotid orifice and entire buccal mucosa with polyethylene film for cutting protection
- Facilitates work far back in the oral cavity
- Flexible; accommodates to cheek movements
- Comfortably stays in place, yet is easily removed with water spray
- Reflective coating for increased visibility and to aid in retraction

NEW! Reflective coating now available.

Ideal for:

- Impressions
- Occlusal Adjusting
- Orthodontics
- Paint-on techniques
- Composites
- Cementation
- Fissure sealing
- Fluoride applications

Simple Technique for Outstanding Results

The reliable, consistent and easy to use system that provides solutions for Class II Restorations.

1 Place the Matrix Band

Select a band that matches the height of the tooth and place it with the concave edge toward the occlusal margin using the SmartTab at the top of the band.

2 Place the Wedge

Place a finger on the band to prevent dislodgment and firmly insert wedge to seal the gingival margin.

3 Place the Ring

Open the ring with your ContactPro[®] Ring Forceps and place it directly over the wedge, seating it as far gingivally as possible.

4 Voila!

Simple technique for outstanding results.

CONTACT PRO SmartBand

Ultra-thin stainless steel for contouring to the tooth

Naturally curved for easy use

SmartTab feature for easy pick-up and placement

Defined marginal ridge

Non-stick coated bands available for easy placement and removal
